Chapter Ten

Weekly Reviews

Ten minutes, once a week. This is where you start noticing patterns.

Why weekly reviews matter more than the daily logs

The daily logs capture the data. The weekly reviews help you find the meaning in it.

A single morning reading tells you very little on its own. But seven readings, compared against your energy ratings, sleep quality, what you ate, and habit completion, can reveal a pattern worth noticing. Patterns help you make considered adjustments instead of reacting to one reading.

The protocol is not a fixed set of rules. It is a framework for learning how your body responds over time: week by week, month by month, then 90 days.

How to use the review

- Pick a fixed day each week and set aside 10 minutes for the review.
- Open your daily logs and copy over the numbers you recorded.
- Calculate the average for each measure: add up the readings you recorded and divide by the number of days that had a reading.
- If you missed a day of logging, don’t guess its value. Average the days you did record, and write down how many there were, so comparisons stay fair.
- Answer the questions briefly, then choose one adjustment for the following week.

This is not daily journaling. Keep your answers specific, and remember that personal notes don’t replace a qualified professional’s interpretation of your lab results.

Weekly Review | Week 1

Week 1 Review

Days 1–7 | complete on Day 7 or 8

Review date: ____ / ____ / _____
Days logged this week: ____ / 7

Averages and baseline snapshot

Average fasting glucose: _____
Fasting glucose, Day 1: _____ Day 7: _____ Change: _____
Average waking energy (1–10): _____
Average sleep quality (1–10): _____
Average cravings (1–10): _____
Days with all habits completed: _____ / 7

Four focused questions

Which measure surprised you most this week, higher or lower than expected?

Which single habit was hardest to keep up?

What did you notice about your body's response this week: energy, sleep, digestion, mood, or cravings?

What one adjustment will I make for Week 2?

Weekly anchor

Why did I start this protocol in the first place? Write one sentence, then rewrite it every week.

Weekly Review | Week 2

Week 2 Review

Days 8–14 | complete on Day 14 or 15

Review date: ____ / ____ / _____
Days logged this week: ____ / 7

This week's averages

Average fasting glucose: _____ | Week 1: _____
Average waking energy (1–10): _____ | Week 1: _____
Average sleep quality (1–10): _____ | Week 1: _____
Average cravings (1–10): _____ | Week 1: _____
Days with all habits completed: _____ / 7 | Week 1: _____ / 7
Zone 2 sessions this week: _____

Four focused questions

Did you notice a difference after adding L-glutamine, apple cider vinegar, or fermented food? What, specifically?

What drove the biggest positive or negative change in your fasting glucose this week, and what do you think caused it?

Which measures moved up since Week 1? Which moved down?

What one adjustment will I make for Week 3?

Weekly Review | Week 3

Week 3 Review

Days 15–21 | complete on Day 21 or 22

Review date: ____ / ____ / _____
Days logged this week: ____ / 7

This week's averages

Average fasting glucose: _____ | Week 2: _____
Average waking energy (1–10): _____ | Week 2: _____
Average sleep quality (1–10): _____ | Week 2: _____
Average cravings (1–10): _____ | Week 2: _____
Days with all habits completed: _____ / 7
Resistance training sessions completed: _____ / 2 planned

Four focused questions

Now that your supplement stack is complete, what has changed most noticeably, positively or neutrally?

How did you feel during your resistance sessions? What adaptation did you notice, such as muscle soreness, energy, or sleep quality afterward?

Cravings this week: _____ versus _____ in Week 1. Why do you think it changed?

What one adjustment will I make for Week 4?

Weekly Review | Week 4

Week 4 Review

Days 22–30 | complete on Day 30 or 31

Review date: ____ / ____ / _____

Days logged this week: ____ / 7

First-month comparison

Measure	Week 1	Week 2	Week 3	Week 4	Trend
Fasting glucose	_____	_____	_____	_____	↑ / ↓ / →
Waking energy (1–10)	_____	_____	_____	_____	↑ / ↓ / →
Sleep quality (1–10)	_____	_____	_____	_____	↑ / ↓ / →
Cravings (1–10)	_____	_____	_____	_____	↑ / ↓ / →
Habits completed / 7	_____	_____	_____	_____	↑ / ↓ / →

Deep review questions

Looking at the trends above, which measure moved most in your favor this month?

Which measure moved less, or in the wrong direction? What do you think is driving that?

Which habit has become automatic, something you do without thinking or deciding?

Which habit still takes deliberate effort every time?

Weekly Review | Week 4

Week 4 Review | continued

Continue the deep first-month review.

Deep review questions | continued

Did anything disrupt the protocol in the past thirty days, such as travel, illness, stress, or social events? How did you handle it, and what would you do differently?

Do your Day 30 numbers support the physical changes you noticed? Is there a gap between how you feel and what the numbers show?

What is my most important focus for Days 31–60?

Weekly Review | Week 5

Week 5 Review

Days 31–37 | complete on Day 37 or 38

Review date: ____ / ____ / _____
Days logged this week: ____ / 7

This week's averages

Average fasting glucose: _____ | Week 4: _____
Average waking energy (1–10): _____ | Week 4: _____
Average sleep quality (1–10): _____ | Week 4: _____
Average cravings (1–10): _____ | Week 4: _____
Days with all habits completed: _____ / 7
Movement sessions (Zone 2 + resistance): _____

Four focused questions

I've been doing this for a month. What has actually changed in my daily experience, not in the numbers?

Has my relationship with food changed since Week 1? How, specifically?

What are others noticing in my life that I might not notice myself?

What one adjustment will I make for Week 6?

Weekly Review | Week 6

Week 6 Review

Days 38–44 | complete on Day 44 or 45

Review date: ____ / ____ / _____

Days logged this week: ____ / 7

This week's averages

Average fasting glucose: _____ | Week 5: _____

Average waking energy (1–10): _____ | Week 5: _____

Average sleep quality (1–10): _____ | Week 5: _____

Average cravings (1–10): _____ | Week 5: _____

Days with all habits completed: _____ / 7

Four focused questions

Which supplement do I notice most when I take it on time, and which do I notice least, for better or worse?

My Zone 2 cardio capacity in Week 6 compared with Week 5: can I keep the same pace for longer? Can I recover faster? What did I notice?

Is anything in my home, kitchen, schedule, work, or sleep making this harder? What change is possible?

What one adjustment will I make for Week 7?

Weekly Review | Week 7

Week 7 Review

Days 45–51 | complete on Day 51 or 52

Review date: ____ / ____ / _____

Days logged this week: ____ / 7

This week's averages

Average fasting glucose: _____ | Week 6: _____

Average waking energy (1–10): _____ | Week 6: _____

Average sleep quality (1–10): _____ | Week 6: _____

Average cravings (1–10): _____ | Week 6: _____

Days with all habits completed: _____ / 7

Four focused questions

The midpoint is approaching. What is the hardest thing about this protocol that I didn't expect before starting?

What has been easier than I expected?

If I had to choose only three habits to keep for the rest of my life, which three would I choose, and why?

What one adjustment will I make for Week 8?

Weekly Review | Week 8

Week 8 Review

Days 52–60 | complete on Day 60 or 61

Review date: ____ / ____ / _____

Days logged this week: ____ / 7

Two-month comparison

Measure	Month 1 (Weeks 1-4)	Month 2 (Weeks 5-8)	Change
Fasting glucose	_____	_____	_____
Waking energy (1–10)	_____	_____	_____
Sleep quality (1–10)	_____	_____	_____
Cravings (1–10)	_____	_____	_____
Days habits completed	_____	_____	_____

To calculate a monthly average, add the four weekly averages for each measure, then divide by 4.

Deep review questions

Looking at your Day 60 lab results, what do they show that your daily logs support or contradict?

Which type of movement (post-meal walking, Zone 2, or resistance training) produced the most noticeable change in how I feel?

How does my gut health look in Week 8 compared with Week 1? What change have I noticed in digestion, bloating, regularity, or response to food?

Weekly Review | Week 8

Week 8 Review | continued

Complete the review at the two-month point.

Deep review questions | continued

Is there something I've been avoiding, or doing inconsistently, that I haven't honestly addressed yet?

Am I applying the protocol for myself, or to prove something to someone else? Does the answer matter?

What is my most important focus for Days 61–90?

Additional notes or questions I want to discuss

Weekly Review | Week 9

Week 9 Review

Days 61–67 | complete on Day 67 or 68

Review date: ____ / ____ / _____

Days logged this week: ____ / 7

This week's averages

Average fasting glucose: _____ | Week 8: _____

Average waking energy (1–10): _____ | Week 8: _____

Average sleep quality (1–10): _____ | Week 8: _____

Average cravings (1–10): _____ | Week 8: _____

Days with all habits completed: _____ / 7

Four focused questions

Two months in, what does an ordinary day look like now compared with Day 1? What has become automatic?

What is the most important thing I've learned about my health that I didn't know before this protocol?

Is my sleep quality still improving, has it plateaued, or has it dropped? What do I think is behind that?

What one adjustment will I make for Week 10?

Weekly Review | Week 10

Week 10 Review

Days 68–74 | complete on Day 74 or 75

Review date: ____ / ____ / _____

Days logged this week: ____ / 7

This week's averages

Average fasting glucose: _____ | Week 9: _____

Average waking energy (1–10): _____ | Week 9: _____

Average sleep quality (1–10): _____ | Week 9: _____

Average cravings (1–10): _____ | Week 9: _____

Days with all habits completed: _____ / 7

Four focused questions

Which foods did I discover I respond to better, giving me steadier energy and fewer cravings? What surprised me?

Which foods or patterns did I discover I respond to worse, even if I thought they were healthy?

How has my relationship with hunger changed since Week 1? Do I experience it differently now?

What one adjustment will I make for Week 11?

Weekly Review | Week 11

Week 11 Review

Days 75–81 | complete on Day 81 or 82

Review date: ____ / ____ / _____

Days logged this week: ____ / 7

This week's averages

Average fasting glucose: _____ | Week 10: _____

Average waking energy (1–10): _____ | Week 10: _____

Average sleep quality (1–10): _____ | Week 10: _____

Average cravings (1–10): _____ | Week 10: _____

Days with all habits completed: _____ / 7

Four focused questions

Day 90 is nine days away. What change am I proudest of when I compare my starting point with where I am now?

What one thing do I still want to change before Day 90?

Is there a habit I started that I'm confident I'll continue after Day 90?

Is there a symptom, lab marker, or pattern in my logs that I want to investigate further because it hasn't been fully explained?

Weekly Review | Week 12

Week 12 Review

Days 82–88 | complete on Day 88 or 89

Review date: ____ / ____ / _____

Days logged this week: ____ / 7

This week's averages

Average fasting glucose: _____ | Week 11: _____

Average waking energy (1–10): _____ | Week 11: _____

Average sleep quality (1–10): _____ | Week 11: _____

Average cravings (1–10): _____ | Week 11: _____

Days with all habits completed: _____ / 7

Four focused questions

Have I booked a retest appointment for Day 90? If not, what's in the way: logistics, cost, fear of the results, or something else?

Have I booked a medical appointment to review my Day 90 results? With whom, and when?

What is my plan for Day 91? Write a specific, practical description of how I will continue.

If someone I care about started this protocol tomorrow, what would I tell them that isn't in the book?

Weekly Review | Week 13

Week 13 | The Full Picture

Days 89–90 | complete on Day 90 or within 48 hours. Take 20 minutes.

Review date: ____ / ____ / _____

13-week summary

Period	Fasting glucose	Energy /10	Sleep /10	Cravings / 10	Habits
Week 1	_____	_____	_____	_____	____ / 7
Week 2	_____	_____	_____	_____	____ / 7
Week 3	_____	_____	_____	_____	____ / 7
Week 4	_____	_____	_____	_____	____ / 7
Week 5	_____	_____	_____	_____	____ / 7
Week 6	_____	_____	_____	_____	____ / 7
Week 7	_____	_____	_____	_____	____ / 7
Week 8	_____	_____	_____	_____	____ / 7
Week 9	_____	_____	_____	_____	____ / 7
Week 10	_____	_____	_____	_____	____ / 7
Week 11	_____	_____	_____	_____	____ / 7
Week 12	_____	_____	_____	_____	____ / 7
Week 13	_____	_____	_____	_____	____ / 7

Overall trend across the weeks: _____

Weekly Review | Week 13

Final Questions

Write about the experience you lived, not about the numbers alone.

Looking at the table, describe in your own words the overall feel of these 90 days. Not the data; the experience.

What did this protocol reveal about your body that you didn't know before?

What did it reveal about your habits, patterns, or beliefs about health and food?

Which measure moved fastest for you, and which moved slowest? What does that tell you about your personal metabolic profile?

What is still unresolved that you want to address over the next 90 days?

Do you feel equipped to continue with this protocol independently, adjusting it based on your own data and raising your needs at medical appointments?

☐ Yes, completely ☐ Mostly; I need support with: _____

☐ Not yet; what I need more help with: _____

Weekly anchor

Why did you start this? Write it one last time, in the same words you used in Week 1.

And now, what do those words mean to you after 90 days?

Close of the protocol

Coach’s Tip

If you’ve made it here, congratulations.

From tracking to understanding

You’ve spent 90 days building new habits, collecting data, and noticing how your body responds. Results differ from person to person, but what you recorded gives you a clear foundation for understanding which patterns deserve tracking.

Day 90 is not the end. It is the start of a new phase: more awareness of your body, and the ability to keep up the habits that suit you.

And this is the beginning of a life with joy and strength that carries you for years to come.

Welcome.

After Day 90

What Comes After Day 90?

The structured learning phase ends. The habits you built don't.

Over these ninety days, you built habits, collected data, and drew a baseline you can compare everything against from here. The next phase is maintenance and refinement.

Keep the habits you were able to build gradually. For supplements, review whether they still suit you and whether you still need them in light of your tests and your health context, with a qualified professional. Don't start or stop them based on the log alone.

After Day 90, you may not need detailed daily logging. Choose a rhythm of tracking you can sustain. Options to discuss with a professional: fasting glucose daily, energy and cravings weekly, and waist measurement monthly.

If you notice indicators trending in an unwanted direction, go back to your logs and look for changes in sleep, stress, food, movement, and health circumstances. You can return to the first steps of the protocol and reassess gut-health support, as suits your health condition and treatment plan.

My follow-up plan

Indicators I will keep tracking

When will I review them, and with whom?

The three habits I will protect first

What sign would prompt me to request an extra review?

Bring your Day 90 test comparison to your next medical appointment. Ask what should be monitored, and whether the results warrant reviewing the plan or treatment. The numbers help you start a better conversation; interpreting them stays tied to your full health context.
